

Setting up iFiles on the iPad

1. Open up the Qrafter app and scan the QR code. Choose Copy to Clipboard on the right side. It won't do anything. It's just copying the information. If you don't have the QR code, you can type in <https://drivegate.eanesisd.net/oneNet/NetStorage> instead of pasting in the following steps.

2. Open the iFiles app. Press Dashboard, then the plus sign in the top left corner. It might say Sidebar. Just press that and you'll see Dashboard next.

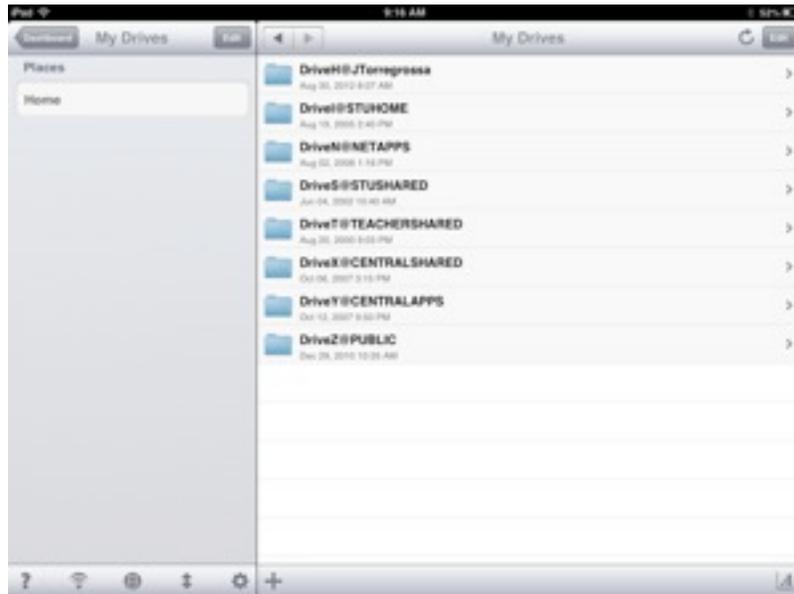

3. After you touch the plus sign, choose WebDav.

4. Paste what you copied from the QR code in the Server box by tapping two times. You'll see a Paste button come up. Fill in your Novell username and password. Some boxes will fill in automatically and numbers will change. That's what it's supposed to do- don't worry! Touch Save.

5. If you are a student, you should see your initials and lunch number on the left side. If you are a teacher, you will see your first initial and last name. Touch that, then Home. You should see several folders. The first one is Drive H. That is your Home Folder.

To Save from Pages
(follow the same directions for Keynote)

1. Touch the wrench in the top right corner. Choose Share and Print.

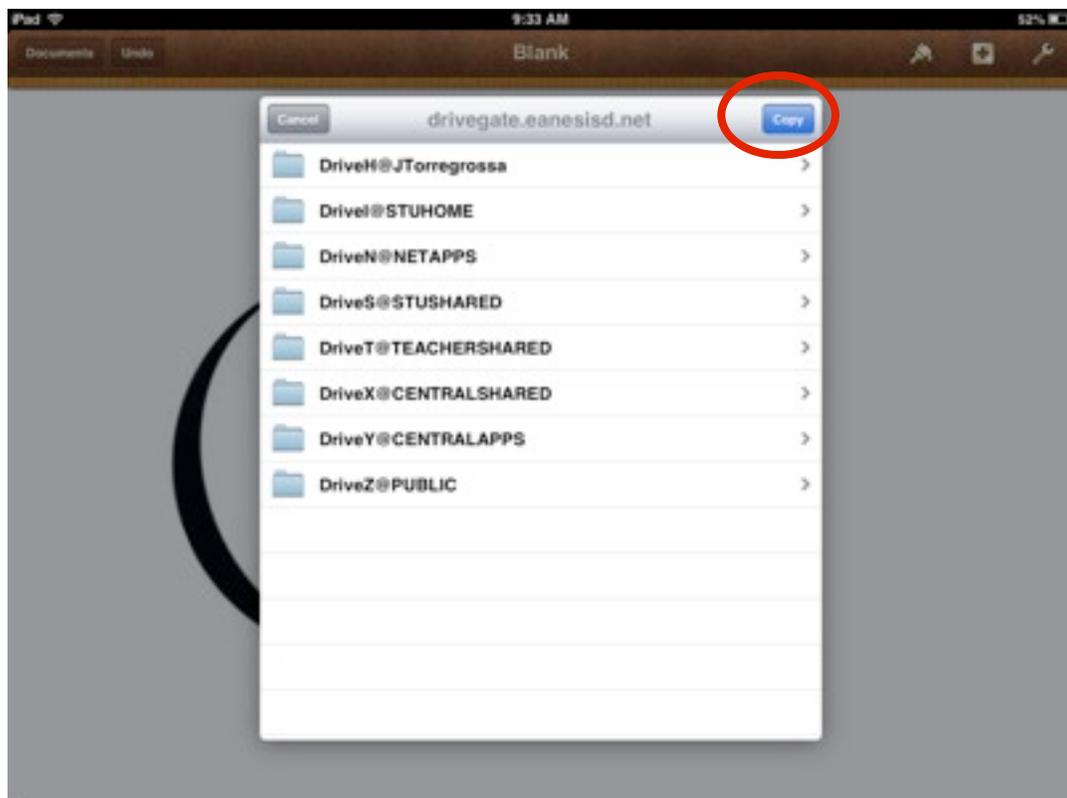

2. Then choose Copy to WebDAV.

3. Go to the Qrafter app and find the QR code you scanned in the first part of these instructions. Choose Copy to Clipboard. Go back to Pages and tap twice in the server address box to paste it in. Or type in <https://drivegate.eanesisd.net/oneNet/NetStorage>. Then type in your Novell username and password. Choose Sign In.

4. Choose either Word or PDF.

6. Choose Drive H to save in your Home Folder. You might have folders inside of your Home Folder. Just touch the folder you want to save to and choose Copy. Now it's saved to iFiles!
